BRIEF SUMMARY

Driven Computer Science Engineer from LNMIIT Jaipur with hands-on expertise in building end-to-end ML and Deep Learning pipelines. Skilled in Python, PyTorch, and applied AI security, with a track record of solving complex problems in domains like medical imaging. Eager to bring a strong technical foundation and a data-driven mindset to build cutting-edge solutions for a dynamic team.

EDUCATION

Secondary (Class X) – CBSE (95.16%) <i>Central Academy Bapu Nagar</i>	2021 <i>Bhilwara, Raj</i>
Senior Secondary (Class XII) – CBSE (88.4%) <i>Central Academy Bapu Nagar</i>	2023 <i>Bhilwara, Raj</i>
The LNM Institute of Information Technology (7.86/10) <i>B.Tech in Computer Science and Engineering</i>	Expected May 2027 <i>Jaipur, Rajasthan</i>

TECHNICAL SKILLS

Languages: Python, C, HTML, CSS, JavaScript, Java(Basics), Shell Script
Libraries & Frameworks: Scikit-learn, PyTorch, TensorFlow, Pandas, Numpy, Langchain, Flask, NLTK, Streamlit
Tools & Platforms: VS Code, Google Colab, Git, GitHub, Hugging Face Spaces
Relevant Coursework: Data Structure and Algorithms (Python), Operating Systems, Computer Networks, Introduction To Database Management Systems, Software Engineering, Design And Analysis Of Algorithm

PROJECTS

InsightSQL – AI-Powered Text-to-SQL Analytics Engine | GitHub

Python, Streamlit, LangChain, Google Gemini 2.5 Flash, MySQL, SQLAlchemy, Pandas, Plotly, RAGAS, Regex, SQL

- Developed an AI-powered Text-to-SQL analytics platform using LangChain, Gemini 2.5 Flash, and MySQL, enabling users to query databases in natural language.
- Built an interactive Streamlit dashboard with automatic SQL generation, schema exploration, and Plotly visualizations for query results.
- Integrated the RAGAS framework to evaluate LLM-generated SQL responses using context precision and helpfulness metrics.

Chat Scholar – AI-Powered RAG Study Assistant | GitHub

Python, Flask, LangChain, FAISS, PyMuPDF, HTML, CSS, JavaScript

- Developed an AI-powered RAG application that allows students to upload study materials (PDFs) and receive accurate, context-aware answers, significantly reducing the time required to search and understand lengthy documents.
- Integrated an automated essay evaluation module that grades student submissions against a predefined rubric using Google Gemini, providing structured feedback to support faster and more consistent assessment for educators.

Privacy-Preserving Concept Drift Detection in Streaming Audio

Python, PyTorch, ADWIN, STUDD, Librosa, Differential Privacy, scikit-learn

- Developed a privacy-preserving, unsupervised audio drift detection system (using a hybrid Teacher-Student approach and ADWIN monitoring), achieving a perfect 1.0 F1 score with zero false positives and minimal delay.
- Enforced privacy-by-design (raw audio deletion post-MFCC, disjoint student training, aggregated-only statistics) with end-to-end pipeline, validated through full ablation study across 3 drift types.

CERTIFICATIONS & ACHIEVEMENTS

- Algo University - Graph Theory
- solved 700+ problems across **LeetCode**, **Codeforces** and **GeeksForGeeks**.

LeetCode: Vishesh.jain | **Codeforces:** Vishesh.jain

EXTRACURRICULARS

- **Coordinator, Volleyball Club — LNMIIT** (August 2025 – April 2026)
- Actively play Cricket and Volleyball
- Enjoy driving and exploring new places.
