PROFESSIONAL SUMMARY

Computer Science Engineering student at LNMIIT Jaipur specializing in Generative AI, Machine Learning, and software engineering. Experienced in building end-to-end LLM, RAG, and privacy-preserving ML pipelines using Python, PyTorch, and LangChain. Strong problem-solver with 700+ competitive programming problems solved across LeetCode, Codeforces, and GeeksforGeeks. Seeking Software Engineer, AI/ML, or GenAI Engineer internship and full-time roles.

EDUCATION

The LNM Institute of Information Technology (LNMIIT) — B.Tech, Computer Science and Engineering Expected May 2027
CGPA: 7.86 / 10.0 Jaipur, Rajasthan
Central Academy, Bapu Nagar — CBSE: Class XII (2023): 88.4% | Class X (2021): 95.16% Bhilwara, Rajasthan

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML/CSS, Java (Basics), Shell Scripting
Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, LangChain, Flask, Streamlit, NLTK, Pandas, NumPy
Generative AI / ML: LLMs, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Databases (FAISS), RAGAS Evaluation, LLM-as-a-Judge, Computer Vision, Transfer Learning, Differential Privacy, Model Evaluation
Databases: MySQL, SQL, SQLAlchemy
Developer Tools: Git, GitHub, VS Code, Google Colab, Hugging Face Spaces
Core CS: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS, Software Engineering

PROJECTS

InsightSQL — AI-Powered Text-to-SQL Analytics Engine | [GitHub](#)

Python, LangChain, Google Gemini 2.5 Flash, MySQL, SQLAlchemy, Streamlit, Plotly, RAGAS

- Architected an end-to-end Text-to-SQL analytics platform using LangChain, Gemini 2.5 Flash, and MySQL with an interactive Streamlit + Plotly dashboard, translating natural language into schema-aware SQL and reducing manual query-writing effort by an estimated 70%+.
- Implemented a RAGAS-based evaluation framework using Llama-3 (via Groq) as an LLM-as-a-Judge to score context precision and response helpfulness of generated SQL across multi-table relational queries.

Privacy-Preserving Concept Drift Detection in Streaming Audio

Python, PyTorch, ADWIN, STUDD, Librosa, Differential Privacy, Scikit-learn

- Designed a privacy-preserving, unsupervised concept-drift detection system for streaming audio using a hybrid Teacher-Student (STUDD) architecture with ADWIN-based statistical monitoring, achieving a perfect 1.0 F1 score with zero false positives.
- Enforced privacy-by-design principles (raw audio deletion post-MFCC, disjoint student-model training, aggregated-only statistics) across an end-to-end PyTorch pipeline, validated through an ablation study spanning 3 distinct drift types.

Solar Panel Defect Classification — AI-Powered Fault Detection System | [GitHub](#) | [Live Demo](#)

Python, TensorFlow, Keras, EfficientNet, Streamlit, Computer Vision

- Designed and fine-tuned an EfficientNet-based CNN using TensorFlow/Keras with transfer learning, data augmentation, and hyperparameter optimization, achieving 83.05% validation accuracy across 6 solar panel defect classes.
- Built and deployed a live inference web app on Hugging Face Spaces using Streamlit, enabling real-time image upload and defect classification for field diagnostics.

ChatScholar — AI-Powered RAG Study Assistant | [GitHub](#)

Python, Flask, LangChain, FAISS, Google Gemini API, PyMuPDF

- Developed a Retrieval-Augmented Generation (RAG) study assistant using Flask, LangChain, and FAISS, enabling students to upload PDFs and receive context-aware answers, cutting document search-and-comprehension time by an estimated 60%.
- Built an automated essay-evaluation module that grades submissions against a predefined rubric using Google Gemini, delivering structured feedback for faster, more consistent assessment.

ACHIEVEMENTS & CERTIFICATIONS

- Achieved Pupil rank on Codeforces and a 1600+ rating on LeetCode, reflecting strong algorithmic problem-solving under competitive constraints.
- Solved 700+ data structure and algorithm problems across LeetCode, Codeforces, and GeeksforGeeks, strengthening core problem-solving and competitive programming skills.
- Completed Algo University's Graph Theory certification, reinforcing advanced graph algorithms for technical interviews.

EXTRACURRICULAR ACTIVITIES

- Coordinator, Volleyball Club, LNMIIT (Aug 2025 – Apr 2026) — organized club activities and inter-hostel tournaments.
